Team Member Connect

Mobile Call-In Portal for Employees

Built for Tulalip Resort Casino

THE PROBLEM

When team members need to call in absent, the process relies on phone calls to a front desk that's already managing guests, check-ins, and walk-up requests. Messages get lost, supervisors aren't notified in time, and there's no reliable record of who called when — or why. It's a process built for 1995 running in 2026.

WHAT IT DOES

SMS LOGIN

Employee number + phone verification. No passwords to forget.

60-SECOND CALL-IN

Step-by-step wizard: type, shift, reason, done.

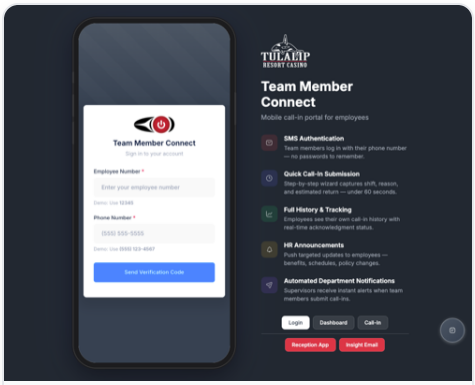
AUTO-NOTIFY

Supervisors get instant alerts. No relay needed.

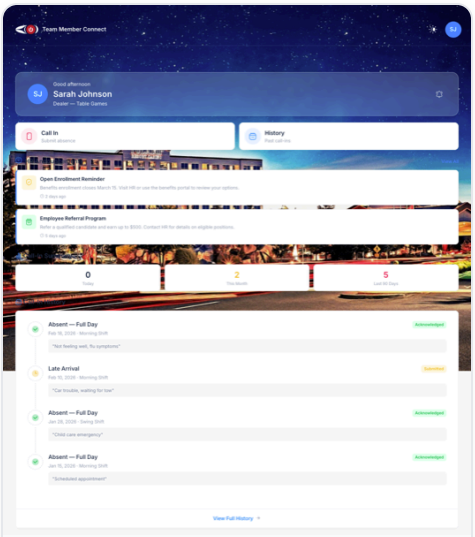
FULL HISTORY

Every call-in tracked with status and acknowledgment.

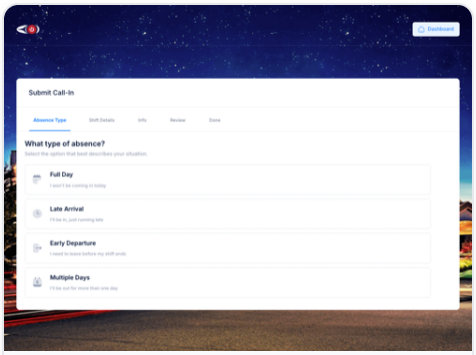
APPLICATION PREVIEW



IPHONE DEMO VIEW



EMPLOYEE DASHBOARD



CALL-IN WIZARD

BUSINESS VALUE

Reduce Front Desk Load

Eliminate call-in phone traffic so reception can focus on guests, not relaying messages to departments.

Real-Time Visibility

Managers see who's out before their shift starts — not after the phone tree finally reaches them.

Accountability & Compliance

Timestamped records for every absence. No more "I called in but nobody told you."
