Team Member **Connect**

Mobile call-in portal for employees

PREPARED FOR Tulalip Resort Casino

SUBMITTED March 2026

CLASSIFICATION Confidential

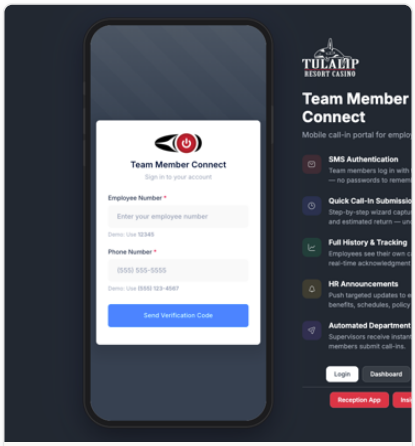
The Problem

When team members need to report an absence, they call a front desk that's already juggling guests, check-ins, and walk-up requests. Messages get lost in handoffs. Supervisors aren't notified until it's too late to adjust staffing. And there's no reliable record of who called, when, or why.

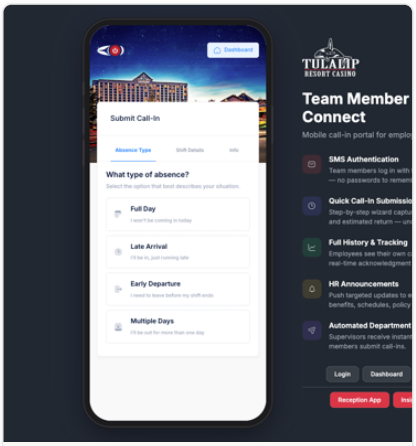
It's a process built for 1995 running in 2026.

> **Team Member Connect** replaces the phone-based call-in process with a mobile-first web application that any team member can use from their personal phone — no app download required, no passwords to remember.

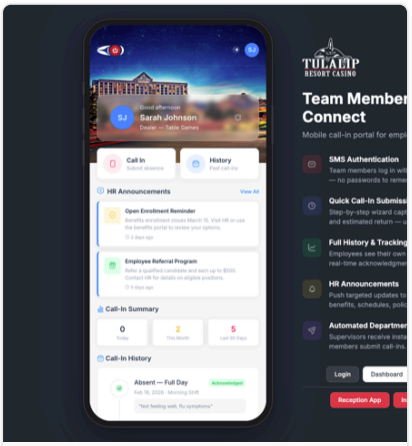
HOW IT WORKS



SMS AUTHENTICATION



SUBMIT CALL-IN



EMPLOYEE DASHBOARD

TIME TO SUBMIT	PASSWORDS REQUIRED	AVAILABILITY	APP DOWNLOAD
<60s	Zero	24/7	None

Capabilities

SMS Authentication
Team members log in with their employee number and phone. A verification code is sent via text — no passwords to create, reset, or forget.

Guided Call-In Wizard
Step-by-step flow: select absence type, enter shift details, provide a reason. Submitted and confirmed in under 60 seconds.

Automated Notifications
Supervisors receive instant alerts when a team member submits a call-in. No relay through the front desk. No missed messages.

History & Tracking
Employees see their own call-in history with real-time acknowledgment status. Managers get department-wide visibility.

HR Announcements
Push targeted updates to employees — open enrollment reminders, schedule changes, policy updates — directly in the app.

Reception Integration
Front desk staff retain a management view for handling walk-up and phone call-ins, with full search and logging capabilities.

BUSINESS VALUE

REDUCE FRONT DESK LOAD
Eliminate call-in phone traffic so reception can focus on what matters most — the guest experience.

REAL-TIME VISIBILITY
Managers know who's out before their shift starts — not after the phone tree finally catches up.

COMPLIANCE & ACCOUNTABILITY
Timestamped records for every absence. Eliminates "I called in but nobody told you" disputes.

IMPLEMENTATION

01 **Configuration & Integration** 2–3 weeks

Connect to existing employee directory, configure department routing, set up SMS provider, and customize branding.

02 **Pilot Department** 2 weeks

Launch with a single department to validate the workflow, gather feedback, and train reception staff on the management view.

03 **Full Rollout** Ongoing

Expand to all departments with department-specific notification routing and reporting dashboards.
